Declass Review by NIMA/DOD

TID - 15/65
13 January 1965

MEMORANDUM FOR: Assistant for Plans and Development

SUBJECT: Cancellation of Requirement for [REDACTED]
Stereosimplex Plotter

25X1A

The requirement for a Stereosimplex Plotter was levied to your staff by TID prior to the knowledge that the OMI AP/C was universal in character, i.e., the AP/C is capable of exploiting ground photography. The development of an AP/3, which is now under investigation in your office, is to include this capability. It is therefore requested that your staff cancel any further activity concerning the purchase of a Stereosimplex.
